

# DISA SNAPSHOT

The Defense Information Systems Agency safeguards communications to enable our nation’s success, from the battlefield to the White House. We deploy, sustain, and secure a comprehensive suite of command, control and communications capabilities, and a universally accessible information infrastructure that enables our military to maintain a lethal advantage, fight when necessary, and win – on land, at sea, in the air, in space, and in cyberspace. Our products and service offerings are developed with all six military services in mind, allowing for true interoperability across the joint force, and with our foreign partners and allies.
